

Missione 4 – Istruzione e Ricerca – Componente 1 – Potenziamento dell'offerta dei servizi di istruzione: dagli asili nido alle Università – Investimento 1.3: “Piano per le infrastrutture per lo sport nelle scuole”, finanziato dall'Unione europea – Next Generation EU

**REALIZZAZIONE DI UNA PALESTRA A SERVIZIO DELLA STRUTTURA SCOLASTICA I.T.T. “G. Malafarina” – Comune di Soverato (CZ) –
CUP C35E22000040006 - CIG: 9543843464**

**Finanziato
dall'Unione europea**
NextGenerationEU

Amministrazione
Provinciale di
Catanzaro

CODICE ELABORATO:
SOVESTR002

NOME ELABORATO:
TABULATI DEI CALCOLI - PALESTRA

R.U.P. : Ing. Antonio Leone

I Progettisti:

Arch. Giovanni B. Giannotti
(mandataria)

GIANNOTTI
ARCHITECTURE & DESIGN

Via A. De Gasperi n°2 88068 - Soverato (CZ)

OMARCH S.R.L.
(mandante)

arch. Fabio Montesano
arch. Roberto Carpino
arch. Domenico Conaci
arch. Antonio Marra
dott. geol. Giuseppe Scala

OMARCH
OFFICINA MEDITERRANEA DI ARCHITETTURA

Via Otranto n°2 88100 - Catanzaro (CZ)

Arch. Danilo Cosco
(giovane prof. mandante)

PROGETTO ESECUTIVO

LUGLIO 2023

REVISIONE N°:

1 Risultati di Calcolo.

1.1 Risultati Condizioni.

Asta	: numerazione interna dell'asta.
Imp.	: impalcato al quale appartiene l'asta considerata.
Fili	: fili fissi ai quali appartiene l'asta considerata.
Nodo	: numerazione interna del nodo.
Nodo Vinc.	: numerazione interna del nodo vincolato.
X	: distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Cinematismi nodali	: valore dello spostamento. Per le azioni sismiche è riferito allo spettro elastico:
V _x	: traslazione X rispetto al sistema di riferimento globale.
V _y	: traslazione Y rispetto al sistema di riferimento globale.
V _z	: Traslazione Z rispetto al sistema di riferimento globale.
R _x	: rotazione attorno all'asse X del sistema di riferimento globale.
R _y	: rotazione attorno all'asse Y del sistema di riferimento globale.
R _z	: rotazione attorno all'asse Z del sistema di riferimento globale.
Sollecitazioni:	
N	: valore dello Sforzo Normale nel punto considerato.
M _T	: valore del Momento Torcente nel punto considerato.
M _{XZ}	: valore del Momento Flettente X-Z nel punto considerato.
T _{XZ}	: valore del Taglio X-Z nel punto considerato.
M _{XY}	: valore del Momento Flettente X-Y nel punto considerato.
T _{XY}	: valore del Taglio X-Y nel punto considerato.
Reazioni:	
R _x	: reazione vincolare in direzione X (riferimento globale);
R _y	: reazione vincolare in direzione Y (riferimento globale);
R _z	: reazione vincolare in direzione Z (riferimento globale);
R _{fx}	: reazione vincolare intorno ad X (riferimento globale);
R _{fy}	: reazione vincolare intorno ad Y (riferimento globale);
R _{fz}	: reazione vincolare intorno ad Z (riferimento globale).
Parete/Piastra	: numerazione dei fili fissi per impalcato della parete/piastra intesa come insieme di elementi bidimensionali;
Sollecitazioni:	
N1-1	: valore dello Sforzo Normale sulla faccia di normale parallela all'asse 1 in direzione 1 nel punto considerato;
N2-2	: valore dello Sforzo Normale sulla faccia di normale parallela all'asse 2 in direzione 2 nel punto considerato;
N1-2	: valore dello Sforzo Normale sulla faccia di normale parallela all'asse 1 in direzione 2 nel punto considerato;
M1-1	: valore dello Momento Flettente sulla faccia di normale parallela all'asse 1 nel punto considerato;
M2-2	: valore dello Momento Flettente sulla faccia di normale parallela all'asse 2 nel punto considerato;
M1-2	: valore dello Momento Torcente sulle faccie nel punto considerato;
T1-3	: valore del Taglio sulla faccia di normale parallela all'asse 1 in direzione 3 nel punto considerato;
T2-3	: valore del Taglio sulla faccia di normale parallela all'asse 2 in direzione 3 nel punto considerato;
Modo:	
f	: valore della frequenza del modo i-esimo;
T	: valore del periodo del modo i-esimo;
G _x	: valore del coefficiente di partecipazione del modo i-esimo;

1.1.1 Risultati Condizioni (Carichi Permanenti - G1).

1.1.1.1 Sollecitazioni SLU

Tabella 1.I

1.2 Inviluppi.

Gli effetti relativi alle varie combinazioni sono considerati utilizzando la tecnica dell'involuppo, in modo da considerare i massimi effetti relativi allo stato limite in esame.

Tale tecnica è stata utilizzata per:

- Cinematismi nodali;
- Sforzo Normale;
- Momento Torcente;
- Momento Flettente X-Z;
- Taglio X-Z;
- Momento Flettente X-Y;
- Taglio X-Y;

1.2.1 Inviluppi dei Cinematismi nodali.

I dati seguenti riportano i valori dei cinematismi nodali dei nodi che definiscono la struttura ed in modo particolare:

Nodo	: numerazione interna del nodo.
X	: distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Cinematismi nodali	: valore dello spostamento. Per le azioni sismiche è riferito allo spettro elastico:
Vx	: traslazione X rispetto al sistema di riferimento globale.
Vy	: traslazione Y rispetto al sistema di riferimento globale.
Vz	: Traslazione Z rispetto al sistema di riferimento globale.
Rx	: rotazione X rispetto al sistema di riferimento globale.
Ry	: rotazione Y rispetto al sistema di riferimento globale.
Rz	: rotazione Z rispetto al sistema di riferimento globale.
Max	: valore massimo (rispetto al sistema di riferimento globale) dell'involuppo.
Min	: valore minimo (rispetto al sistema di riferimento globale) dell'involuppo.

1.2.1.1 Inviluppi SLO.

1.2.2 Involuppi dei diagrammi delle sollecitazioni: Sforzo Normale.

I dati seguenti riportano i valori dello Sforzo Normale relativamente alle aste che definiscono la struttura ed in modo particolare:

Asta : numerazione interna dell'asta.
X : distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Sforzo Normale (N) : valore dello Sforzo Normale nel punto considerato:
Max : valore massimo (rispetto al sistema di riferimento globale) dell'involuppo.
Min : valore minimo (rispetto al sistema di riferimento globale) dell'involuppo.
Comb : combinazione di appartenenza del valore considerato nell'involuppo.

Tabella 27.I

Sforzo Normale (N) [daN]

1.2.3 Involuppi dei diagrammi delle sollecitazioni: Momento Torcente.

I dati seguenti riportano i valori del Momento Torcente relativamente alle aste che definiscono la struttura ed in modo particolare:

Asta : numerazione interna dell'asta.
X : distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Momento Torcente (M_T) : valore del Momento Torcente nel punto considerato:
Max : valore massimo (rispetto al sistema di riferimento globale) dell'involuppo.
Min : valore minimo (rispetto al sistema di riferimento globale) dell'involuppo.
Comb : combinazione di appartenenza del valore considerato nell'involuppo.

Tabella 28.I

1.2.4 Involuppi dei diagrammi delle sollecitazioni: Momento Flettente X-Z.

I dati seguenti riportano i valori del Momento Flettente X-Z relativamente alle aste che definiscono la struttura ed in modo particolare:

Asta : numerazione interna dell'asta.
X : distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Momento Flettente (M_{xz}) : valore del Momento Flettente X-Z nel punto considerato:
Max : valore massimo (rispetto al sistema di riferimento globale) dell'involuppo.
Min : valore minimo (rispetto al sistema di riferimento globale) dell'involuppo.
Comb : combinazione di appartenenza del valore considerato nell'involuppo.

Tabella 29.I

1.2.5 Involuppi dei diagrammi delle sollecitazioni: Taglio X-Z.

I dati seguenti riportano i valori del Taglio X-Z relativamente alle aste che definiscono la struttura ed in modo particolare:

- Asta : numerazione interna dell'asta.
X : distanza dal nodo iniziale misurata lungo l'asse dell'asta.
Taglio (T_{xz}) : valore del Taglio X-Z nel punto considerato:
Max : valore massimo (rispetto al sistema di riferimento globale) dell'involuppo.
Min : valore minimo (rispetto al sistema di riferimento globale) dell'involuppo.
Comb : combinazione di appartenenza del valore considerato nell'involuppo.

Tabella 30.I
